Brief Mention.

High water to-day, 3:28 p. m.

In order to get the discount on your gas bills they should be paid to-day at the Gas company's office, No. 80 Crown street.

The Ancient Order of Hibernians held its sixteenth annual soiree at Harugari hall Monday evening and was very largely attended.

Charles O. Francis, of Francis Bros., who has been ill three weeks, was able to be out for the first time Monday, but he will not resume business just yet.

Dr. A. M. Alling, of York street, is building a beautiful residence on a commanding site a few rods northeast of Professor Richards' place in Woodbridge.

The primary lesson will be taught by Miss Walkley at the close of Professor Sanders' class this (Wednesday) afternoon at 5:30 o'clock at United church chapel.

Thomas Crouch, of Branford, who was removed to Grace hospital last week suffering, it was feared, with appendicitis, is now very comfortable. An operation, it is now thought, will not be necessary at this time.

The Ladies' Benevolent society of the Davenport church on Green street will hold a sale, entertainment and supper at the church parlors to-morrow evening. The supper will be served at 6:30. The public is invited to attend.

The condition of Henry E. Baldwin, of Woodbridge, who is very ill with typhoid fever, was reported somewhat improved yesterday. Dr. Marsh, of Westville, is attending the patient, and said yesterday that he believes he has passed the crisis.

Sterling lodge, A. O. U. W., has an occasion of great interest to the lodge and friends this evening. The lodge will entertain Grand Master Ward, of Boston, also the grand secretary and other prominent officials. There will be a banquet and special exercises.

Miss Rebecca Beach, of this city, the donor of Newtown's beautiful library, was the guest there yesterday afternoon of the lady patrons of the library. A tea was arranged in honor of Miss Beach and a large number of Newtown's prominent women were present.

There will be a meeting of the directors of the Consolidated road held at the Grand Central depot in New York Saturday afternoon, at which suitable arrangements will be made in regard to the attendance of the officials at the funeral obsequies of ex-President Clark.

William E. Fenno, the former secretary of the R. R. Y. M. C. A., who left this city a few days ago to take a position in the same work at the Brooklyn navy yard, in a letter to Mr. Bowman, superintendent of the New Haven terminal, is very enthusiastic regarding his new work.

Miss Hope Ives, daughter of C. P. Ives, the restaurateur of No. 256 State street, this city, and now teaching in the public school of Glastonbury, is spending the Easter vacation with her mother and sisters in Pine Orchard and Mill Plain. Miss Ives returns to her duties April 15.

The steamer Chester W. Chapin, which was hauled off Patience Island Saturday, has been towed to Newport where an examination of the damage has been made. Later the Chapin will be taken to New York and dry docked. It is believed the damage to the steamer can be easily repaired.

At the meeting of the fire commissioners this evening the committee which has charge of the benefit entertainment and also the subscriptions received for the families of the recently deceased firemen, the victims of the Judson packing house fire, will meet with them for the purpose of arranging the distribution of the moneys received by the committee.

ÆGOPODIUM—IS WHAT—

If the Baby is Cutting Teeth.

Be sure and use that old and well-tried remedy, Mrs. Winslow's Soothing Syrup, for children's teething. It soothes the child, softens the gums, allays all pain, cures wind colic, and is the best remedy for diarrhea. Twenty-five cents a bottle.

dll MWF & w ly

THE SIXTY TYPHOID CASES

(Continued From First Page.)

that time the secondary cases which invariably appear resulting from carelessness of attendants are expected.

The question of germs still remaining in the city water has not yet wholly been answered, although Officer Wright's statement in his report to the board yesterday seems convincing. He said that the next day after the Dawson supply was cut off the pipes in the city containing water from this source were blown off. Opposed to this is the statement made by Dr. Lindsley on Monday evening that the distributing pipes in the city had yet to be flushed by the company. No information can be got from citizens in the infected district that the hydrants were opened at the time or that they were directed to let the faucets run in their houses. If the infected water was not flushed out at once the new pressure from another reservoir may have sent it to another part of the city. There seems to be some confusion in the minds of the officials as to whether, when the company flushed the main pipes leading from the reservoir, they also attended to the distributing pipes in the infected streets of the city.

An important move of the officials yesterday was their notification to the Water company to let the water now in Lake Dawson stand for at least a month for the germs to die out, and to then draw it off and fill the lake with fresh water. Lake Dawson has been supplying a part of the community in Westville, which, it seems, will now have to dispense with city water until the month is over.

In view of a protracted siege against the epidemic, a large question which now looms up is what action the authorites at Yale will take in the matter. Health Officer Wright said last night that, personally, if he had a son at Yale who was at present out of the city he would do his best to keep him away. Anson Phelps Stokes, jr., secretary of the corporation, has been out of town until yesterday, and when seen last night said that he had not yet had time for proper investigation into the matter.

Professor F. W. Spinutius, instructor in chemistry at Lehigh university, and chemist in the employ of the Bethlehem Water company, stated yesterday that after an analysis of the water from Lake Dawson he believes that New Haven people are not suffering from typhoid, but from a sort of malarial typhoid. Physicians interviewed last night said they believe the epidemic to be true typhoid, and that malaria and typhoid are distinct, cases not running from one into the other.

It has been decided that only one of the patients at the jail suspected of being typhoid victims is suffering from that disease. The typhoid patient is James Carroll, who was committed to jail last fall for a long term on conviction of obtaining money under false pretenses. The other patient, a prisoner named Donnelly, is ill with malaria, which was at first thought to be typhoid fever.

Three more typhoid patients were received at New Haven hospital yesterday, making the total number of patients there now ill of typhoid fever twenty-two. It was stated at the hospital last night that some of the typhoid patients were quite sick, but that none of the cases was yet considered critical.

One more typhoid patient was received at Grace hospital yesterday, making the total number now there suffering with that disease eight. None is dangerously ill.

REPORT OF HEALTH OFFICER.

Dr. Wright Renders Account of the Origin of the Epidemic.

Following is the report rendered by Health Officer Wright at the meeting of the board of health yesterday afternoon. It was unanimously approved and accepted, and the board adopted the recommendation of the health officer to notify the Water company that water from Lake Dawson cannot be supplied to consumers within the limits of New Haven until the water now in the lake has stood for at least one month and then drawn off and the lake filled with fresh water. Another resolution was passed asking the state board of health to co-operate with the city board in its investigation of the present epidemic.

The health officer's report is as follows:

Mr. President and Gentlemen of the Board of Health:

I beg leave to call your attention to a number of cases of typhoid fever now prevailing in New Haven and lay before you a full report of the situation. On the morning of April 3 (last Wednesday) six cases of this disease were reported by two physicians, each reporting three cases. While this number is unusual for this season of the year, there seemed to be nothing to attract special attention, but during the latter part of the day repeated inquiries by physicians and the fact that an unusual number of blood specimens had been sent to the bacteriologist to have the Widals test applied, excited my suspicion that we were on the verge of an outbreak of this disease. This was increased at a meeting of the New Haven Medical association held the same evening, when many physicians stated that they were in attendance upon persons whom they suspected to be ill with the disease. The next morning I came to this office very early that I might find if more cases had been reported, and found eight new cases. The location of these cases and conversations by telephone with several physicians led me at once to believe the trouble was in the water supply, as all of the cases were in the western part of the city, extending north and east as far as Dixwell avenue and south and east as far as Congress and Howard avenues.

My next move was to telephone those physicians residing in the adjoining town whom I knew to be practicing in the vicinity of the storage lakes and along the streams leading to the same. Several cases were learned of in this way in different localities, but the only ones that could be regarded as likely to cause the outbreak were those happening in a German family living in Woodbridge, near the Bethany line and nearly a mile above Lake Dawson.

I at once consulted with Mr. Daggett, the secretary of the New Haven Water company and ascertained that the western part of the city was wholly supplied with water from this lake, and that the parts extending north and south to the lines above given, were partially supplied from the same service, the quantity and distances depending upon the pressure in the pipes, of the water from other lakes.

I immediately made an appointment with the physician who had been in attendance upon the Woodbridge cases, to visit the family. I wished him to accompany me as I believed the people would talk more freely in his presence. As soon as possible we drove out to the place which is about eight or nine miles from the city. I found that there had been three persons sick with typhoid fever in the house. They had called the doctor to the first case January 27, and he had made but a few visits.

On March 4 he had been again called and this time he found two more sick. He instructed the head of the family to bury the fecal discharges, and in carrying out the instructions the man had taken them several hundred feet from the house and buried them as I estimate from his description, about six or eight inches deep in plowed ground distributed over an area of at least a hundred feet square and within fifty to a hundred feet of a dry waterway. All of this was told to me in the presence of the physician and I believe the same to be true.

The next day, I am told by the officials of the water company, when four or five of them visited him, he said that he had buried the discharges in a very circumscribed area, and at a depth of two feet. This is at variance with his statements to me, and seems hardly probable as there was more or less frost in the ground and the amount of care necessary to do this is not consistent with the general appearance of the premises.

On March 11 came the first heavy rainfall, and a few days later the second. Just when this fecal matter was washed away is only a conjecture, but that it was is evidenced by the fact that the surface of the ground all around in the vicinity of the place where the discharges had been buried had been excavated by the heavy rains, having furrows from three to six inches deep, leading to the edge of the waterway, through which water could only escape in a direction leading directly to Lake Dawson.

Fortunately I was able to observe how large a quantity of water sometimes goes down this course, as it was raining heavily while I was there, and a stream several feet wide was running violently past at the time.

Upon my return home at about 5:30 p. m. I notified the secretary of the Water company that I believed I had located the source of the infection, and that evening, by request, met the president, secretary and Dr. H. E. Smith, the chemical expert of the Water company, and laid the facts as above stated before them, with the result that in my presence and without a protest the water from the lake was ordered shut off from the supply pipes and the waste gates opened.

The next day the pipes in the city containing water from this source were blown off. The only water from this lake now used is in about twenty houses in Westville, where it is impossible to supply other water, and the occupants of these houses have been warned of the danger of using this water without boiling. Within twenty-four hours of the first evidence of a serious outbreak of typhoid the source of the infection had been, to my mind, definitely located, and steps had been taken to prevent further infection from this source.

On April 3 we had reported six cases, April 4 ten cases, April 5 thirty-six cases and April 6 the same number. At the time of the presentation of this report there have been reported a total of 211 cases, and the diagnosis of typhoid fever in over seventy of these has been verified by Widal's test.

In addition to the above investigation we are as fast as possible ascertaining of each individual case the water—whether city, well or spring, ice and milk supplies, whether or not the sick persons have eaten raw oysters or clams, celery or other uncooked vegetables, the sanitary condition of the premises, the condition of the plumbing, whether or not the sick one has been out of the city within three weeks of being taken ill and finally if proper instructions have been given in regard to the disinfection of the excreta.

If is to be expected, even if we have been so fortunate as to have properly located the source of the infection that there will be many cases for at least two weeks, and there will be secondary cases in other parts of the city.

The waste gates of Lake Dawson have been open since very early in the morning of April 5, and I understand the lake should be emptied in two or three days. The heavy rains of the past few days have kept the lake full notwithstanding the gates are open. The pond by this time must be pretty well flushed out, and any pathogenic material there must be pretty well diluted.

It is not in the province of your body to order how the lake or premises upon which the infection is assumed to originate, shall be disinfected, but it is in your power to prevent the water being brought within the limits of New Haven until you are satisfied that such is free from infection.

As it is probable that pathogenic bacteria are destroyed by the common water bacteria within a few weeks and that any disease-producing bacteria in this water are now largely diluted, I recommend that your honorable board notify the New Haven Water company that water from Lake Dawson cannot be supplied to consumers within the limits of New Haven until the water now in the lake has stood for at least one month and then drawn off and the lake filled with fresh water.

Respectfully submitted,
FRANK W. WRIGHT,
Health Officer.

THE GENERAL ASSEMBLY

(Continued from Second Page.)

tion of $2,000 for the care of imbeciles at Lakeville.

The committee on public health and safety reported a bill concerning the regulations and inspection of bake shops. It provides that all bakeries shall be properly ventilated as the inspector of factories shall direct; no cellar or basement not now used as a bakery shall be used as one hereafter; and a celler heretofore occupied as a bakery shall, when once closed, not be reopened. Every bakery shall be furnished with proper washroom and water closets apart from the bakeroom. Every bakery shall be at least eight feet in height, the sidewalls shall be plastered or wainscotted, the ceiling plastered or ceiled with lumber or metal, and, if required by the inspector of factories shall be whitewashed at least once in three months; food products shall be kept in perfectly dry, airy rooms; the sleeping places for employes shall be kept separate from the bake room; the owner or lessee of a building shall make alterations thirty days after they are prescribed by the factory inspector. Violation of the law shall be considered a misdemeanor and the person shall be fined not less than $20 nor more than $50 for the first offense; not less than $50 nor more than $100 or imprisonment not more than ten days for the second offense, and shall be fined not less than $200 and imprisoned not more than thirty days for the third offense. No person shall be permitted to work in a bakery who is suffering from tuberculosis or communicable skin affection, and employers are required to maintain themselves and their employes in a clean and sanitary condition. The bill was tabled for calendar and printing.

The committee on railroads held an important hearing on petitions for permission to build trolley lines to connect New Haven and Cheshire and New Haven and Meriden. There were four petitions for lines to enter New Haven from the northwest. The petitions were as follows:

H. P. No. 54, of the Meriden, Southington and Compounce Tramway company, for amendment to its charter; H. P. No. 137 and H. J. R. No. 73, Francis Atwater et al., for the incorporation of the Meriden, Waterbury and Cheshire Street Railway company; S. P. No. 27, of C. K. Alger et al., for a charter for a street railway through Hamden and Cheshire; H. P. No. 188, for a street railway in Cheshire; extension of the Fair Haven and Westville railroad to Mt. Carmel, Hamden and Cheshire.

A number of residents of Dwight street who had signed the remonstrance against the granting of a franchise to lay tracks in that street appeared before the committee, among them being John H. Fowler and John A. Richardson. The common council, to which the remonstrance was presented in addition to its presentation to the legislature, has instructed the corporation counsel to oppose the granting of the franchise to put tracks in Dwight street and before the hearing yesterday Corporation Counsel Robertson secured from representatives of the Meriden, Southington and Compounce company a promise that that company would withdraw its petition for permission to construct tracks from Mt. Carmel into New Haven and would ask permission only to extend its tracks to Mt. Carmel.

The hearing was not completed yesterday and subsequent hearings on the various petitions will be assigned by the committee.

CHARGED WITH BASTARDY.

Luigi Gentile Arrested on Complaint of Superintendent Spier.

Luigi Gentile, an Italian who lives on Fair street, was arrested last night by Sergeant Gibson on a warrant charging bastardy. The complaint was made by Superintendent Spier, of the department of charities and correction, and charges Gentile with the paternity of a child born to an Italian woman named Carmina Esposito. It is alleged that the woman is the wife of Gaetano Coro, but that she has been living in adultery with Gentile. The complaint sets up that the child is likely to become a charge upon the city, and that the woman refuses to bring action against Gentile for support of the child.

HEALTH NOTICE!

Householders Cautioned.

TYPHOID FEVER PREVALENT.

Rely Upon Platt's Chlorides to Disinfect Your Premises.

Typhoid, now prevalent, can be prevented by the careful boiling of drinking water and the thorough use of a reliable disinfectant. For purifying the waste pipes, closets, sinks and all waste carrying arrangements, for sprinkling about the cellars, store rooms, etc., Platt's Chlorides has proven a most reliable and economical disinfectant. It is a colorless liquid and when diluted and sprinkled about leaves no stain or smell while it instantly removes any foul odors and destroys disease-breeding matter. A quart bottle will last an average family a month and it can be obtained at all druggists and high-class grocers. ap10 3t

FAIR HAVEN HAPPENINGS

ITEMS OF INTEREST FROM BOTH SIDES OF THE RIVER.

Strong School Teachers Arranging a Reception to Principal Graves—Easter Supper at the Grand Avenue Baptist Church This Evening—Farewell to Dr. and Mrs. Mitchell.

The teachers of Strong school are arranging a reception to be given to Sherman I. Graves, the new supervising principal, on Saturday evening. The affair will be given at the Strong school and the teachers of the Strong district and the supervising principals of the city are invited. An orchestra will provide music, there will be vocal selections and a light luncehon served. The affair is arranged that the new principal may become acquainted with all the teachers.

James H. Hawkins, of East Haven, is very ill with neuralgia.

William H. Chidsey, of East Haven, was severely injured from the effects of a fall on Monday.

It has rained every day this month and the people are wondering when they will ever behold the sun again. But the farmers say there is prospect of a good hay crop.

This evening the Ladies' Aid society of the Grand avenue Baptist church will furnish an Easter supper. Besides the usual bill of fare eggs will be served in a variety of ways. The price of the supper is fifteen cents.

A farewell reception is to be given to Rev. Dr. Mitchell and wife in the parlors of the Grand avenue Congregational church on Wednesday evening of next week. Each of the societies in the church have appointed representatives to arrange the details and this committee met last evening to further the arrangements. It is expected that a large number will attend the reception. Later in the week Dr. and Mrs. Mitchell will leave for their new home in Attleboro, Mass.

"The Peak Family" gave an entertainment at the Montowese Baptist church Monday evening. The ladies were costumed to represent the several characters, their make up attracting considerable attention. The parts were well taken and the entertainment was a great success, there being a large attendance, the sum of $30.04 having been taken at the door. After the entertainment the company adjourned to the vestry, where refreshments were served.

A thief broke into the barn of Edward Ball, of Montowese, Monday night, and stole a can containing forty quarts of milk. Mr. Ball says he hopes the thief will return the milk can.

The choir of the East Pearl street M. E. church is practically completed for the ensuing year. Miss Neva E. Squires will continue as choir leader and the make up of the organization will be as follows: Soprance, Miss Squires, Miss Bertha Warner, Mrs. Henry I. Barnes and Miss Amanda Palmer; altos, Miss Lottie Fairchild and Miss Bessie Roberts; tenors, A. Jerome Bowen and F. Grant; basses, Charles Leigh, Lovell Page and Charles Hamilton. One more tenor voice is to be secured. James McGovern will continue as organist.

Rev. R. T. McNicholl left for Brooklyn yesterday to attend the New York East conference of the Methodist church. He will return after conference to remove his family to New York city, where he is to be settled as pastor for the coming year.

Dr. John J. Selbold, of 224 Blatchley avenue, and family, will remove this week to Cleveland, O., which was Mrs. Selbold's former home. Dr. Selbold has been located in Fair Haven for several years.

Over in Foxon William Jones is building a new barn on the site of the building that was destroyed by fire a few weeks ago.

CHRIST CHURCH, EAST HAVEN.

The annual meeting of Christ church, East Haven, was held Monday night. Dwight W. Tuttle was chosen senior warden, William K. Stevens junior warden, C. C. Kirkham, John Tuttle and Leland M. Thompson vestrymen, George Heitman parish clerk and Dwight W. Tuttle treasurer. There is to be an adjourned parish meeting on May 20.

"Arabella rather startled the club."

"How?"

"Well, she was to have a paper on 'The Functions of Fiction,' and she came up with one on 'The Fictions of Functions.'"—Detroit Free Press.

The New Dining Tables-New Prices

Following the interesting news of the arrival of the sideboards, comes this announcement of the new dining tables. Perhaps the best idea of the extent of this showing of furniture for the spring of 1901, may be gathered from the fact that we have twenty-seven patterns in dining tables alone. Round or square tops. Prices for the new extension tables run thus: $3.95, $5.45, $5.85, $6.75, $7.50, $9.45, $10.75—up to $58.00.

A QUIET WEDDING.

Plainville Couple Married in Poughkeepsie.

Plainville, April 9.—Miss Bertha Cady, kindergarten teacher in the public schools, and Harry E. Propson, an electrician, were quietly married at Poughkeepsie, N. Y., Sunday, and reached home Monday morning and announced the fact to the bride's father, A. D. Cady. Propson has been in Plainville but a few months and little is known concerning him. He is employed by the Trumbull Electrical company. He is twenty-one and the bride is eighteen. They are living with Mrs. Propson's parents.

NATIVE STRAWEBRRIES IN APRIL.

Edward Malley's gardener, Joseph Addcock, showed us yesterday some fine ripe strawberries of the Nick Omer variety, five and three-quarter inches in circumference, grown in pots under glass. A few of these specimens are on exhibit in the palm tea room of the Edward Malley company. Unquestionably these are the finest samples of this popular fruit which have ever been grown in this section.
